

Have you ever used the term “**Night and Day Difference**”?

Take a look these pictures and see the “**Night and Day Difference**” between a couple of exhaust components from a newer model Polaris snowmobile.

By simply Ceramic Coating your parts you will not only see the benefits of Ceramic Coating but also experience the performance gains. Our Ceramic Coating “Cermakrome” not only gives you a “**Striking Finish**” but studies have also shown it can increase horsepower by decreasing engine temperatures and increasing exhaust flow. Its high temperature range is capable of 1300° F.

Cermakrome is a great choice for all Motorsport enthusiasts for your Car, ATV’s, Bikes and Snowmobiles. We can do it all. Join the “**Winners Circle Where Winners Finish**”.

Give us a call at Professional Plating, Inc. and let us help you get the “**Striking Finish**” you are looking for.
