

March 23, 2023

Good Morning!

Professional Plating is pleased to announce that we are expanding our footprint once again in an effort to continually meet the needs of our valued customers.

An investment of over \$4 million is being made on a brand new zinc barrel line that will be on-line by the end of calendar 2023 in our Brillion, Wisconsin facility.

Once on-line, this zinc barrel line will be the second zinc barrel line that will be operational in our facility.

We are pleased to make this investment that will allow the valued team members at PPI to continue to deliver the service levels that our customer base expects of us.

For more information about Professional Plating and where we can add value for you and your business, please check our website at [www.proplating.com](http://www.proplating.com).
